

Thurs. 03/11/10

1:10pm

Unit 2 called out of service at Howe Street station, at 1:23pm, I was on my way there and witnessed Steve and Ed sitting in the truck with it still running. I sat and watched them for 5-minutes doing nothing until a mailman walked up and started talking to Steve through the window. At that point, I drove by and asked on the radio that they be more productive with their time rather than sitting in the truck with it running. After a couple of minutes, Steve called back on the radio and asked me to come back. Steve said that they had just arrived at that station and that the mailman had immediately showed up to talk to him, I told him that was untrue and that I watched them for a period of time before I went by. He lied to me about that. A 30-minute conversation followed that included Steve's comments of me and Comm. Salerno being head hunters and after his job. I told him that it was untrue and that he was expected to do his job without being asked for everything. He said he would prefer a list of things daily, I said that my job description does not include being a babysitter, they should be able to keep themselves busy without prompting. I told them that they had been caught several times in the past month wasting town-time and sitting around when things could be done, I specifically listed the last 4 events and they agreed that they were wrong in doing it, I asked why it continued, they had no response.
